

6.5.2 The institution reviews its teaching learning process, structures & methodologies of operations and learning outcomes at periodic intervals through IQAC set up as per norms and recorded the incremental improvement in various activities

DOCUMENT-1 ACADEMIC CALENDAR 2020-21

For more information about the study, please contact Dr. John D. Cawley at (609) 258-4626 or via email at jdcawley@princeton.edu.

2025 RELEASE UNDER E.O. 14176

The analysis of historical documents and artifacts can provide valuable insights into the past, but it is important to approach this work with sensitivity and respect for the people and cultures represented.

10 of 10

ANSWER The answer is **100**. The first two digits of the number are 10, so the first two digits of the square root must be 10.

These results indicate that the present study can be considered as a first step in the development of a new methodology for the assessment of the environmental impact of the production of energy from biomass.

On the other hand, it is interesting to note that the many thousands of species of plants and animals that have been described in the literature are not all equally well known.

Music Curriculum

The music curriculum at St. John's follows the National Curriculum for Music. It aims to ensure that all pupils: perform, listen, appraise and compose, using their voices and instruments. Pupils learn to sing and play a variety of musical instruments, including the piano, glockenspiel, ukulele, drums, recorders and xylophones. They learn about different musical genres and explore how music can be used to express different feelings.

Music is taught weekly in Key Stage 1 and Key Stage 2. Pupils have the opportunity to learn a musical instrument in Year 3 and Year 4. This is a free service provided by the local authority. Pupils can choose from a range of instruments including the ukulele, recorder, keyboard, brass and woodwind instruments.

Music is taught through a variety of schemes including Charanga, Rhythm Band and the Primary Kodály Curriculum. These schemes provide a range of resources and activities to support the teaching of music. Pupils are encouraged to sing and play instruments in a variety of ways, including solo, duet, group and ensemble performances. They also have the opportunity to perform in school assemblies and other events.

Music is taught through a variety of schemes including Charanga, Rhythm Band and the Primary Kodály Curriculum. These schemes provide a range of resources and activities to support the teaching of music. Pupils are encouraged to sing and play instruments in a variety of ways, including solo, duet, group and ensemble performances. They also have the opportunity to perform in school assemblies and other events.

It is interesting to note that the results of the present experiments are in general agreement with those of previous workers. Thus, for example, the findings of the present study are in close agreement with those of the authors of the present paper, who found that the rate of absorption of glucose by the rat liver was increased by the administration of insulin.

The author wishes to thank the Director of the National Research Council of Canada for permission to publish this paper.

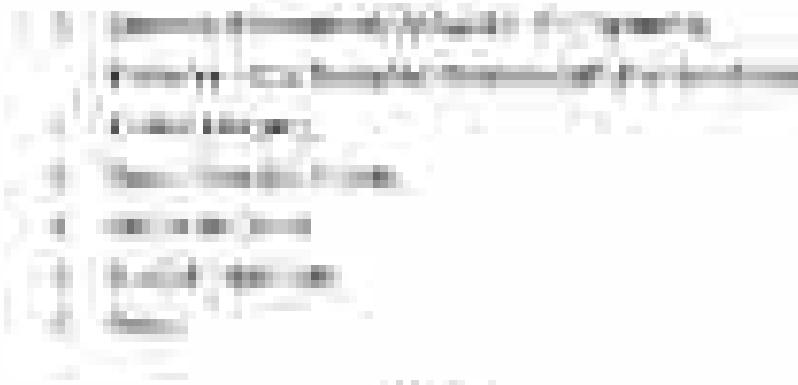

Afterwards, we can apply the same technique to the other two cases. In the first case, we can prove that the solution of the problem is unique by contradiction. Let us assume that there exist two different solutions ϕ_1 and ϕ_2 to the problem. Then, we have $\phi_1 \neq \phi_2$ at some point x_0 . By the continuity of ϕ_1 and ϕ_2 , there exists a neighborhood U of x_0 such that $\phi_1|_U \neq \phi_2|_U$. This contradicts the fact that ϕ_1 and ϕ_2 are both solutions to the problem. Therefore, the solution is unique. In the second case, we can prove that the solution is unique by contradiction. Let us assume that there exist two different solutions ϕ_1 and ϕ_2 to the problem. Then, we have $\phi_1 \neq \phi_2$ at some point x_0 . By the continuity of ϕ_1 and ϕ_2 , there exists a neighborhood U of x_0 such that $\phi_1|_U \neq \phi_2|_U$. This contradicts the fact that ϕ_1 and ϕ_2 are both solutions to the problem. Therefore, the solution is unique.

It is also important to understand the relationship between the different types of data and how they can be used together to gain a more complete understanding of the system being studied.

THEORY OF MIGRATION AND ITS TYPES

TYPE	DEFINITION
1. Domestic Migration	Movement from one place to another within the same country.
2. International Migration	Movement from one country to another.
3. Urban Migration	Movement from rural areas to urban centers.
4. Rural Migration	Movement from urban centers to rural areas.
5. Seasonal Migration	Movement that occurs annually between two locations.
6. Refugee Migration	Movement due to political or social instability.
7. Displaced Persons	Movement due to natural disasters or conflicts.
8. Internal Migration	Movement within a country.
9. External Migration	Movement outside a country.

NOTICE TO PROPOSERS

The National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), is soliciting applications for grants and cooperative agreements to support research projects in the area of **Antimicrobial Agents and Chemotherapy**. Applications will be accepted from qualified applicants throughout the year.

Applications will be evaluated for scientific merit and priority based on the following criteria:

REVIEW CRITERIA

• Scientific Merit
• Priority
• Adequate Resources

Document:8TeachingMethods–2024

1. Lecture Method: A traditional teaching method where the teacher delivers information to the students through lectures.
2. Discussion Method: A teaching method that encourages students to participate in discussions and share their ideas and opinions.
3. Demonstration Method: A teaching method where the teacher demonstrates a process or skill to the students.
4. Project-Based Learning: A teaching method where students work on real-world projects to learn and apply skills and knowledge.
- .5.Role-Playing Method: A teaching method where students act out roles to learn and practice skills and knowledge.
6. Problem-Based Learning: A teaching method where students learn and apply skills and knowledge by solving real-world problems.
7. Flipped Classroom Method: A teaching method where students learn basic concepts at home and work on activities and projects in the classroom.
8. Gamification Method: A teaching method where game design and mechanics are used to engage students and promote learning.
9. Experiential Learning Method: A teaching method where students learn through direct experience and hands-on activities.
10. Collaborative Learning Method: A teaching method where students work in groups to learn and complete tasks.

THE FEDERAL BUDGET AND THE STATE BUDGET

Allocation of State and Local Government Funds

The budget of the state government is the most important document in the state's financial system. It is the primary tool used by the state to plan and control its financial resources. The budget is prepared by the state legislature and approved by the governor. It is a detailed plan for the use of state funds for the next fiscal year.

The budget is divided into two main parts: the general fund budget and the capital budget. The general fund budget is the largest part of the budget and is used for day-to-day operations. The capital budget is used for major capital projects such as building new schools, roads, and infrastructure.

The budget is prepared by the state legislature and approved by the governor.

The budget is divided into two main parts: the general fund budget and the capital budget. The general fund budget is the largest part of the budget and is used for day-to-day operations. The capital budget is used for major capital projects such as building new schools, roads, and infrastructure.

The budget is prepared by the state legislature and approved by the governor.

Category	Amount
General Fund Budget	\$100,000,000
Capital Budget	\$50,000,000
Total Budget	\$150,000,000

The budget is prepared by the state legislature and approved by the governor.

1. **What is the primary purpose of the study?**
The primary purpose of the study is to evaluate the effectiveness of a new treatment for depression compared to a placebo. The study will also assess the safety and side effects of the treatment.

2. **Who is eligible to participate in the study?**
Eligible participants include adults aged 18-65 years old who have been diagnosed with major depressive disorder. Participants must be willing to commit to a minimum of 12 weeks of treatment and follow-up visits.

3. **What are the inclusion criteria for the study?**
Inclusion criteria include a diagnosis of major depressive disorder, a minimum score of 18 on the Beck Depression Inventory (BDI-II), and a minimum score of 10 on the Hamilton Rating Scale for Depression (HRS-D).

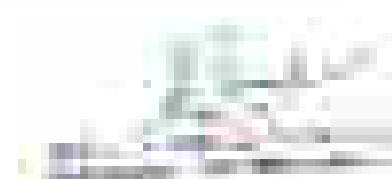

4. **What are the exclusion criteria for the study?**
Exclusion criteria include a history of suicidal behavior, a history of substance abuse or dependence, and certain medical conditions such as heart disease or hypertension.

5. **How many participants are needed for the study?**
The study aims to recruit approximately 300 participants across four sites.

6. **What are the study procedures?**
Participants will be randomly assigned to either the treatment group or the placebo group. Both groups will receive 12 weeks of treatment. The treatment group will receive the new treatment, while the placebo group will receive a dummy pill. Participants will be assessed at baseline, week 4, week 8, and week 12. Side effects will be monitored throughout the study.

7. **What are the potential risks and benefits of participating in the study?**
The potential risks of participating in the study include side effects from the treatment or placebo, as well as the time commitment required for weekly visits and follow-up calls. The potential benefits include access to a new treatment for depression and the opportunity to contribute to medical research.

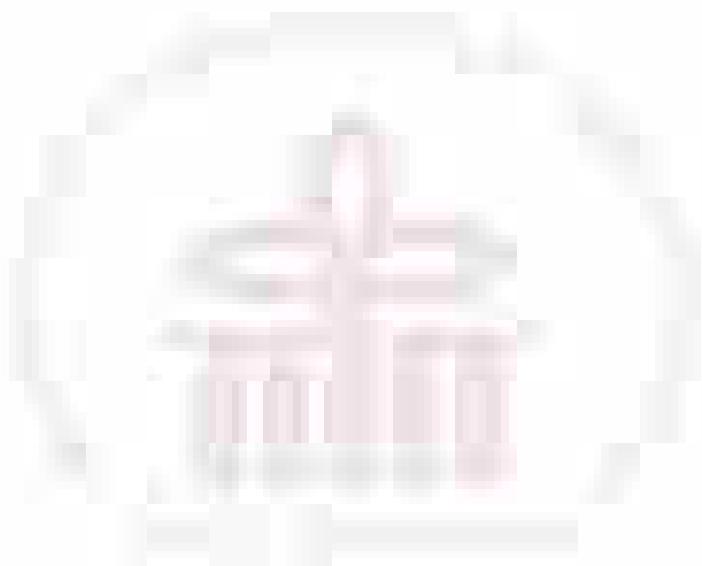

8. **What are the costs associated with participation in the study?**
There are no costs associated with participation in the study.

ENVIRONMENTAL AUDIT REPORT

2023-24

Period
July 2023 - June 2024
Prepared
by
Department of Zoology

Environmental Audit

The National Assessment and Accreditation Council New Delhi [NAAC] has made it mandatory from the academic year 2016 – 2017 onwards that all Higher Educational Institutions should submit an annual Environmental Audit Report. It is a part of Corporate Social Responsibility of the Higher Educational Institutions to ensure that they contribution towards the reduction of global warming through Carbon Footprint reduction measures.

CONCEPT

The term ‘Environmental Audit’ means differently to different people. Terms like ‘Assessment’, ‘Survey’ and ‘Review’ are also used to describe similar activities. There is a believe that an ‘Environmental Audit’ addresses only environmental matters, although there no universal definition of ‘Environmental Audit’, many leading companies/institutions follow basic philosophy and definition adapted by the “International Chambers Of Commerce” [ICC].

The ICC defines Environmental Auditing as:-

“A management tool comprising a systematic, documented, periodic and objective evaluation of how well environmental organization, management and equipment are performing with the aim of safe guarding the environment and natural resources in its operations/projects.”

INTRODUCTION

A clean and healthy environment aids effective learning and provides a conductive learning environment. There are various efforts around the world to address environmental education issues.

Environmental Management Systems [EMS] is very popular in the industrial sector but the general belief is that EMS is something pertaining to industry only. Other parts of the world have started adopting compatible environment management system either voluntary or for the promoting standards by external certification.

A very simple indigenized system has been devised to monitor the environmental performance of the educational institutions. The environmental monitory helps the institutions to set environmental examples for the community and to educate young learners. It can be adapted to urban and / or rural situations.

OVERVIEW OF THE INSTITUTION

ST. ANN'S COLLEGE FOR WOMEN (A) is a Christian minority institution under the management of ST. ANN'S Society purely instituted in 1976 for the empowerment of young girls through education. It has walked confidently through the significant annals that made women with the integrity of mind and heart.

St. Ann's Junior College and Degree Colleges always has its reputed stand in all round development and in achievements. Academic excellence is its heritage, integrated development is its claim.

Along with intellectual competence the college provides platform for every student for every student for their unique development through NCC, NSS, Sports Games meet cultural festivals, Counselling spiritual and Social Programmes.

The lovely green, clean, serene college campus is the sweet home for many who nurtured their lives and reached high and still keep pushing themselves ahead.

St. Ann's College for women (A) imparts education from Intermediate to Graduation level in the following:-

ENVIRONMENTAL AUDIT

The areas of environmental Auditing to be followed by the institution:-

Waste Minimization:-

The college spans over 5 acres and has a total strength of including intermediate and degree students, respective teaching and administrative staff. The working hours of the college is from about seven hours which includes a lunch break. Post working hours, the hostel is active with students and administrative staff. The administrative efforts of managing such a large area and people is therefore considerable. Among various requirements the waste management & minimization has been accorded high priority to maintain hygienic and to keep the area clean and tidy at all times.

The various types of waste generated in the campus are:

SOLID WASTE: Comprises of mostly papers, old books, worn out cleaning materials such as books for storing cleaning agents, acid bottles, worn out mops, brooms, clothes, various food containers, packaging material for college hostel and canteen requirements, disposal plates, cups, spoons etc.

LIQUID WASTE: Sewage and drains of washrooms, kitchen.

E-WASTE: Printed Circuit board, Computer hardware such as life expired printers, computers, defective electronic equipment of labs etc.

The college management has adopted various measures towards prompt and safe disposal of all the above mentioned waste. With an in depth understanding of the harmful effects caused by plastic, the college has been notified as a plastic free environment. The college encourages handling of college and hostel food products either using steel implements such as containers, spoons, plates etc or biodegradable paper cups, plates etc. To sanitise and create awareness among students, conspicuous boards have been set up against the use of plastic. The college also adopts the efficient concept of the 3R's namely Repair, Reuse and Recycle to dispose waste. For handling of day to day waste generated due to consumption by the students and teachers, the dust bins have been segregated into dry and wet waste. All such wastes are disposed into two deep pits one each for dry and wet inside the college premises. The most packaging material is reused for transportation from college to other places. All the used newspapers and magazines are disposed through scrap dealers.

Usage of paper in office is minimised to 20%. Reuse of one side printed paper for internal communication.

Dry leaves are used for mulching process.

Vegetable waste and old newspapers are used for vermicompost.

The college has a well networked drainage system which is connected to municipal sewage lines. Additionally provision has also been made for treatment of wastewater and its flow into the natural vegetation of the college campus thereby aiding its growth towards a Green Environment. The college has installed tanks for collecting rain water which can be used for watering the plants.

XJ

All the medical and chemical wastes are disposed off through incinerators as mandated by the government rules.

The E-Waste is disposed off through buy back policy. All the organic waste is dumped into a vermicompost pit for generating manure is used for maintenance of garden, lawns.

GREENING:

The college spans over 5 acres with 75% of garden area. The plantation in the campus includes variety of plants. Trees like Mango, Neem, Sapota, Amla and variety of fruits are present throughout the campus. The college campus also includes Cactus, Adenium, Hibiscus, Anthodium, Tulasi, Aloevera etc. The college includes 300 varieties of weed plants.

The college encourages students to spend time in the garden for 2 – 4 hours in a month. Plant Distribution Program is practiced by the college. Saplings are distributed to the visitors and guests at various occasions. The college has staff [Gardeners] working to maintain the greenery of the campus.

Organic farming is practised in our college to minimise the use of chemical fertilizers and manure. It also promotes healthy lifestyle.

ENERGYCONSEVATION:

Architectural design for our college is based upon use of natural lighting and ventilation, to save extra power for bulbs and fans.

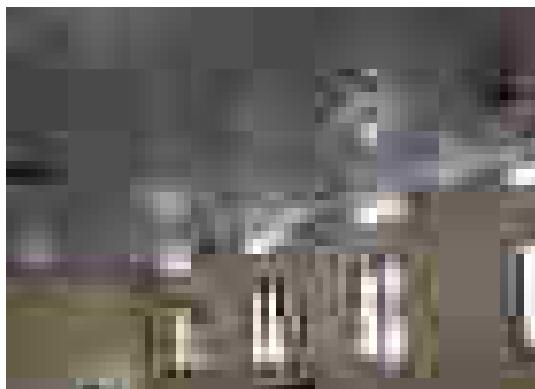

FlorescentbulbsarereplacedwithCFLbulbs.

The college has put up solar panels through which energy can be conserved.

Energy is also conserved by using natural light in the classrooms.

The college has a canopy of trees and plants that make the environment carbondioxide free and to maintain health of all the inmates.

The college organises the lectures on Energy conservation on order to give awareness to the students.

WATERCONSERVATION:

The basic use of water in the college campus:

- Drinking
- Gardening
- Kitchen and Toilets
- Others

The storage water is done by the following aids:

- Overhead water tanks
- Water pits
- Rainwater storage tanks

Wastewater is used for Garden in the campus.

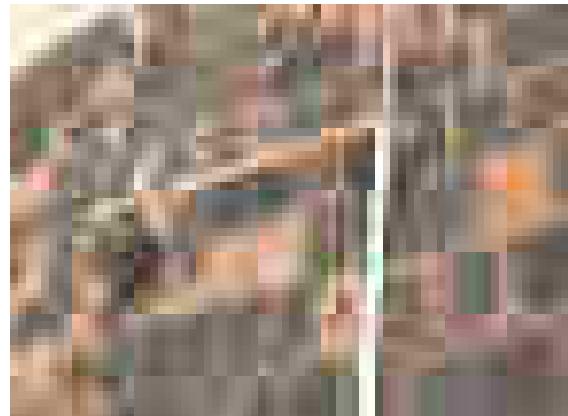

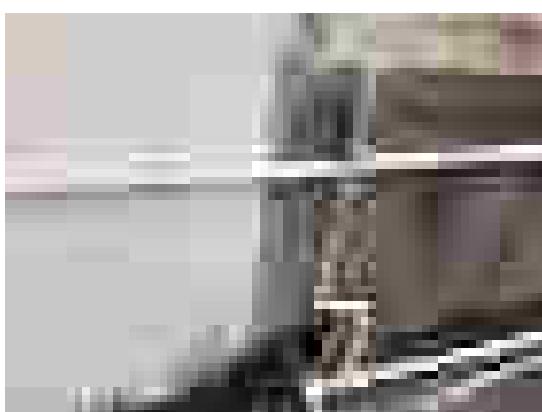

The basic ways practised in the campus to reduce the amount of water usage :

Close the taps after usage.

Maintenance and monitoring of valves in supply system to avoid overflow , leakage and spillage.

Water conservation awareness for students.

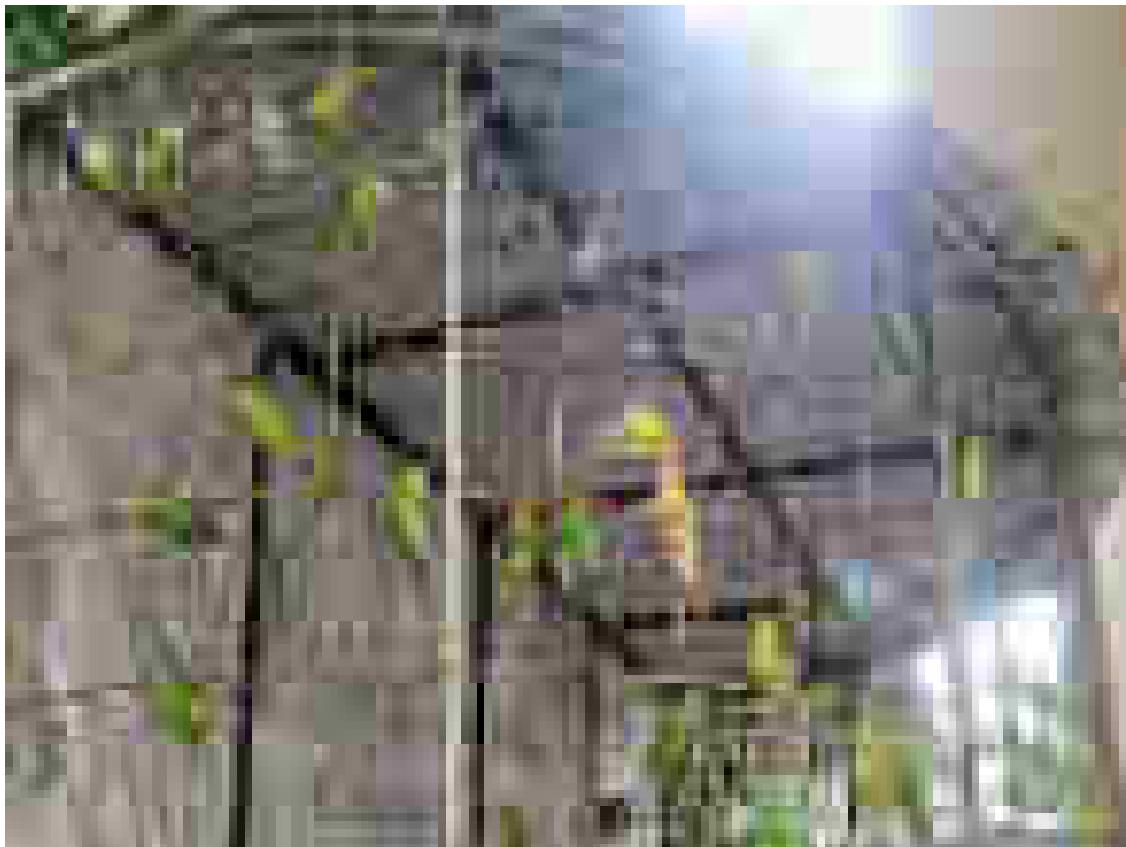

CLEAN AIR:- All the rooms are well ventilated. Windows are designed in such a way that the flow of air is at ease. The college has a canopy of trees and plants the make the environment carbondioxidefreeandtomaintainhealthofalltheinmates.Thegardenhaswidevariety of trees which provide shade and a beautiful ambience. Heavy duty vehicles are strictly prohibited in the campus.

Thus the above factors provide clean air to the campus.

ANIMAL WELFARE:-Birds, Squirrels & Tortoise are commonly found in campus. A variety of bird species and other flora and fauna available but these are not harmful to human so the college doing their best for its conservation. Besides this the college also see the welfare of some animals like rabbits, hens, ducks, cows & buffaloes. The college also creates awareness about conservation of variety of animals.

7. ENVIRONMENTAL LEGISLATIVE:- The college is aware of all environment laws pertaining to different aspects of environmental management.

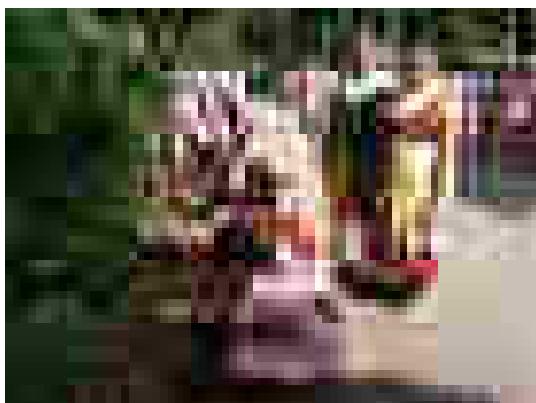

The college follows all the environmental laws and does practises to its best to conserve the environment

8. GENERALPRACTICES:-

The college is aware of all environmental laws pertaining to different aspects of environmental management.

Periodically pollution reduction, plantation, energy conservation awareness campaigns carried out by the college.

SwatchBharatAbhiyaanbystudentsatthecampus.

Plantation programmes are practised in the campus.

Flora and fauna conservation.

Gardeners are appointed in the campus to maintain the gardens.

Maintenance of water pits.

Maintenanceofproperdrainagesystem.

Usage of LED Lights and solar power to conserve energy.

Practising two dust bin system.

MaintenanceofSanitaryNapkinIncinerator.

Mineral water plant established in the campus for healthy and pure water.

Practise of vermicompost as a part of waste management system.

The college management declared the St. Ann's college for women is a plastic free campus

Conclusion:-

Thus St. Ann's College is giving top priority to eco- friendly activities. With these eco-friendly activities our students are respecting nature and trying their best to protect the environment and natural resources which is fulfilling the objective of " Protecting Nature" of higher education.

In eco- friendly activities, St. Ann's College For Women is praised as a model college by Andhra University and other higher education institutes.

"ProtectEnvironmentAndPromoteOurLife"isthemottoofSt.Ann'sCollege.

GREEN

Audit

2023-2024

Period

July 2023 – June 2024

Prepared By:

Green Audit Committee

Department of Botany

GreenAudit

A clean and healthy environment leads to the effective learning and provides a constructive learning environment. There are many efforts around the world regarding the environmental issues. Green audit is the most efficient tool of management system used methodologically for protection and conservation of the environment. It is also used for the sustenance of environment.

The term green indicates the eco-friendly nature without causing any damage to the environment. So green auditing can be defined as systematic identification, quantification, recording, reporting and analysis of components of ecological activity and expressing the same in financial and social terms.

Benefits of green auditing:

1. Efficient resource management
2. To create green campus
3. Cost saving methods
4. Reduction of waste generation
5. Water recycling
6. Plastic free campus
7. Health conscious environment
8. Imparting environmental education through systematic environmental management
9. Financial savings through reduction in resource use
10. To increase the awareness of social responsibility
11. Developing an environmental ethical values system in students
12. Enhancement of college motive

Vision and Mission:

By the proper use of resources available in the campus, following the methods of conservation, reducing the generation of waste and its reuse, college can be maintained plastic free, clean and green. By adopting 3R's – Regeneration, Recycle and Reuse, we can enhance the college profile within a short period and maintain and sustain the environment forever.

St. Ann's college for women is located in Malkapuram area, Visakhapatnam, A.P, India. Total area of college campus is 5 acres of which 50% is covered by greenery. There is a provision of green audit committee in the college campus. A committee has been formed to monitor the proper conservation and use of natural resources in the campus.

Following the suggestions of IQAC Botany department has taken the responsibility to do green audit with the cooperation of principal and green audit committee. A report on green audit has been prepared by the department of Botany, St. Ann's college for women, Malkapuram, Visakhapatnam.

The college was established in 1976. Total area of college campus is 5 acres of which 50% is covered by plants of different types – Herbs, Shrubs, trees of different economic values such as medicinal, food and ornamental. The plants were systematically identified by the department of Botany.

The green audit report has been discussed with the green audit committee. The main aim is to increase the greenery in the campus. Extra efforts have been taken by the college to create environment consciousness amongst the students. The important step in this regard is extensive

plantation program was conducted by the NSS, NCC, green audit committee and students of Botany department. Extension program was conducted to create environment awareness and conservation of Biodiversity among the students and public.

Pre-Audit Stage:

A pre-audit meeting was conducted to determine the scope and objectives of the green audit. It was held at St. Ann's College for Women, Malkapuram, Visakhapatnam. It was decided to gather the information according to the protocol and plan of green audit procedure. Audit team was selected and actual plan of procedure was laid down.

Scope and goals of green auditing:

1. To create green and healthy study environment for the students, it is necessary to conduct green audit in the colleges so that the students become aware of the advantages of saving the planet and they become good citizens of our country.
2. The plan is very user friendly and totally voluntary.
3. The aim of the program is to set the environmental example for the community and to educate the young learners.
4. Improving energy efficiency and savings
5. Implementation of effective water conserving measures
6. Waste management strategies to reduce the waste generation
7. Enhancing biodiversity in the campus
8. Reducing carbon footprint.
9. Finally achieving clean and green campus

Target areas of green auditing:

The green audit is a part of resource management process. Eco campus concept mainly focused on the efficient use of energy and water, minimize waste generation and pollution increasing greenery and also economic efficiency.

1. Auditing for water management

Water is a natural resource of all living organisms depend on water while barely available in many natural environments but the water usage by human beings is increasing day by day as the population is increasing. Aquifer depletion and water contamination is taking place at unprecedented rates. So it is essential that any environmentally responsible institution should examine its water use practices.

2. Auditing for energy management

Energy use is clearly important aspect of campus sustainability. So it is essential that any environmentally responsible institution examine its energy use practices.

3. Auditing for waste management

Pollution from waste can cause health problems. Plastic bags, discarded ropes, strings, paper, tins, garbage, glass bottles etc are hazardous to the health of not only human beings but also other flora and fauna of the campus. So solid waste can be recycled, repaired and reused. Thus the minimization of solid waste is essential to a sustainable college.

4. Auditing for green campus management

Nowadays biodiversity is facing serious threats from the loss of habitats, pollution and over consumption. Species are disappearing at an alarming rate. This leads to disturbance of ecological balance or homeostasis. So ecological systems and functions will break down.

Trees play an important role ecological role within the urban environment by absorbing great amounts of CO₂ and releasing oxygen for people. So educational institute has to give importance for greenery as it clears the environment, maintains health, reduces stress and shows impact on mental and physical health.

5. Auditing for Carbon footprint

Emission of greenhouse gases into the environment by people has great impact on environment gap. Greenhouse gases are water vapor, CO₂, methane, nitrous oxide and ozone. Of all these, CO₂ is the most important one as it comprises of 402 ppm of the earth's atmosphere. So any environmentally responsible institutions should examine the carbon foot print and take action.

Methodology of green auditing

The process of auditing has a special purpose. It has to ensure that the practices followed in the campus are in accordance with the green policy adopted by the institution. The methodology involves 3 steps

1. **Data Collection:** The data is collected as the first step by using different tools such as observation, survey, communicating with others and measurement.
 - Team went to each department, library, canteen etc
 - Data is collected by observation and interview
 - The power consumption of appliances was recorded by taking average value in some cases
2. **Data Analysis:** Calculation of energy consumption, analysis of the electricity bill of the campus, tariff plan adapted by the AP Govt electricity board, data related to water usage, vegetation analysis, biodiversity etc.
3. **Recommendations:** On the basis of data analysis and observations, some steps for reducing power and water consumption, proper treatment for waste, increasing greenery in the campus, reducing the use of fossil fuel etc are suggested
4. **Audit Stage:** At St. Ann's college of women, auditing was done with the help of management, teaching and non-teaching staff and student groups.
5. **Staff and students involved in green auditing:**
 - Chairperson: Dr. Sister Prema Kumari, Principal
 - General Coordinator: Dr. G. Adi Seshu, Asst. Prof. - Botany
 - Faculty in charges
 - i. Triveni - Asst. Prof in Physics
 - ii. Lakshmi Tulasi - Asst. Prof in Zoology
 - iii. Valisha - Asst. Prof in Chemistry
 - iv. Anjali - Asst. Prof in Chemistry

- vi. Sudha-Asst.ProfinBotany
- Technicalincharge:MissKirthiLewis
- Nontechingstaff
 - i. Rajeswari
 - ii. Suryanarayana
- Students
 - i. PrathimaIIB.Sc.
 - ii. SwapnaIIB.Sc
 - iii. MadhuriIIB.Sc
 - iv. SruthiIIB.Sc
 - v. SubhavaniIIB.Sc
 - vi. YathishadeviIIIB.Sc
 - vii. RevathiIIIB.Sc
 - viii. AnuradhaII B.Sc
 - ix. DeepthiIIB.Sc
 - x. DurgaDeviIIB.Sc
 - xi. DurgaManalisaIIIB.Sc
 - xii. HarithaIIIB.Sc
- Clubsinvolved
 - i. Scienceclub
 - ii. Botanyclub
 - iii. NSSUnits
 - iv. NCCUnits
 - v. Ecoclub
 - vi. DeptLevelassociations

6. GeneralSteps:

- Systematicandcomprehensivedatacollection
- Documentationwithphysicalevidences
- Independent evaluation with regulatoryrequirements and appropriate standards
- Systematic andcomprehensive improvementandmanagement of existing system

7. ProcessofAudit:

- Thesiteofareathatistobeauditedwasselectedcollege
- Datesofauditweredetermined
- Theauditscopewasidentified
- Theauditplanwasdiagnosed
- Responsibilitiesofgreenauditcommitteewereassigned
- Backgroundinformationofthesite,location,soilandgroundwaterwas collected
- Thepre-auditquestionnairewasinformedtoauditee

8. OnsiteAuditactivities

Theonsiteauditincludes

- Opening meeting is the first step between green audit team and departmentofBotany.Inthismeetingpurposeofprocedureandtime

schedule were discussed

- Site inspection was the second step for on-site activity
- Data and information are collected according to the audit protocol
- Some meetings were conducted when there was a necessity while conducting the survey and observation

9. Procedure followed

The students and staff were divided into groups under the guidance of the teaching staff in charge. Each group collected data on assigned topics:

- Analysis of air quality and biodiversity i.e., Identification of plant species and count - Green campus management
- Analysis of water quality and usage – Water management
- Analysis of energy consumption and cost – Energy management
- Analysis of water generation and disposal – Waste management
- Gathering audit evidence i.e., collecting data and information using audit protocol
- Communicated with the staff of audit to obtain most information
- Evaluated the audit evidence against the objectives established for the audit
- Meeting to explain audit findings

Report:

1. Analysis of air quality and biodiversity

Basing on the data collected by the identification of plant species and biodiversity in the college campus, there are 349 species of plants in the college campus. Total plants are 12435 in number, out of which 325 are trees, 1091 are shrubs, 10246 are herbs and 773 are climbers. These plants in our college contribute to the oxygen supply that we utilize. Being situated in the urban area that too in industrial area, our college is exposed to various atmosphere pollutants from vehicles and also by external means like NTPC, coromandel port etc.

Based on our collected data, the different sources of carbon dioxide emission in our college are

- a. Vehicles
- b. Refrigerators
- c. Air conditioners
- d. RO water plant
- e. Burning

- **Vehicles** – Vehicles on the days of data collection were 5 cars and 20 scooters and 10 bikes in our campus. These vehicles may contribute to high carbon dioxide emission. The students, teaching and non-teaching staff and the visitors also contribute to CO₂ emission.
- There are 6 refrigerators and 3 air conditioners and 2 water coolers in our campus
- The vermicompost unit is also established by the department of Zoology and Botany. All the fallen leaves, food wastes, kitchen wastes from garden, hostel and canteen are used for this purpose.

- Plastic wastes, covers, plastic bottles are collected by the students and stored in the waste pits for the purpose of recycling papers, food wrappers are collected from all classes will be burnt near the compound wall of the entrance gate.

2. Analysis of water quality and usage

The college campus has many water outlets. We have counted the total number of taps and rainwater harvesting pits. In total there are ***** taps and 2 coolers and one rainwater harvesting pit worth ***** litres and one RO water plant

3. Analysis of energy consumption and costs

The college is well equipped with electricity supply. Each department possess fans, plug points, tube lights, bulbs, computers, printers etc. As part of green campus initiation, we shifted from conventional energy to renewable energy. To reduce electricity bill and increase the renewable energy installed a solar grid which is useful for our campus and electricity bill is reduced. In addition to this equipment our college also have

- Laminar airflow
- Hot plates
- Exhaust fans
- Incubator
- Wall fans
- Hot air ovens
- Photoelectric calorimeter
- LCD projector
- Telephones
- Handmikes
- Calorimeters
- Inverters
- Projectors
- Speakers
- CC cameras
- Biometric machine
- Centrifuges
- Cooling fans
- Autoclaves

4. Analysis of Waste generation and disposal

Waste cannot be avoided in any environment. That can be separated as bio degradable and non-biodegradable. Biodegradable wastes like food wastes, plant products etc can be easily decomposed by the bacteria in the soil. But non bio-degradable waste cannot be degraded and remains as it is for many years.

Canteen: The food waste from the canteen is collected and used in vermin compost pit. Plastic waste is collected and disposed.

Hostel: Food waste is used for vermin compost preparation

Office: Paper waste is collected and reused

Library: Paper waste is collected, reused and sold

Store: Not much waste is produced. Paper and plastic covers are burnt.

Garden: Plastic and paper waste is very less. Fall leaves, branches etc. are collected and used in vermi compost pit.

Auditorium: After each program waste is collected and burnt

Washrooms: Waste is collected and burnt

Classrooms: Paper waste is collected and burnt. Plastic waste is disposed. Food waste is very less and used for compost production.

Laboratory: Broken glass items and other metal and wooden parts of the spoiled instruments are disposed after proper washing and cleaning.

College premises: Plastic waste is less but paper waste is more and collected and burnt

Observations:

1. On analyzing air quality, we could assess that there are many pollutants in our environment are mostly from vehicles. The burning of waste especially causes emission of poisonous gases in the atmosphere. The emissions from the industries around our college campus are contributing much. But many plants are there in our college campus. They purify the polluted air supply enough oxygen for the healthy atmosphere.
2. There are sufficient water outlets for all the departments, wash rooms, labs etc. But it requires checking whether all are in working condition or not. They need frequent checking and repairs to prevent leakage and waste of water.
3. Energy consumption is very important to take care of solar system which is already there but it is better to establish another one also care should be taken towards the prevention of wastage of power and unnecessary use.
4. Waste generated is also a problem. Cleaning and collecting of waste and burning is also a problem
5. Animal waste is also properly used as manure and is used in compost preparation

Routine green practices:

1. World Environment Day – June 5th
Awareness seminars are organized on various environmental problems. Planting the saplings and conducting various competitions etc. are activities
2. Ozone Day – Sept 16th
3. World Water Day – March 22nd

4. World ocean day—June 8th

5. World food day
6. Green campus drive is an initiative to protect the college environment
7. College is declared as no plastic zone
8. College protects old age trees and more number of new trees are planted
9. Biodegradable waste is collected and made into compost. Non bio-degradable and electronic waste are regularly disposed
10. The campus is lush green with gardens, lawns, flowers and plants wherever there is open space
11. Rainwater is harvested and collected. Science club and eco clubs are active in college.
12. Important days like world environment day, world water day, ozone day, world ocean day, Hiroshima Nagasaki day etc. etc. are observed and several programs including processing with placards, banners, competitions, plays, dramas etc. are conducted by various departments, NSS & NCC, science club, eco clean etc. to create awareness in environment protection and conservation.
13. Our college allocated weekly one period in the timetable for clean and green in the campus. Every Saturday last period will be clean and green practice only.
14. Plants and saplings will be distributed to outside the college campus also
15. Not only plants, animals and birds are also maintained in the college.

Current saving methods adopted in college:

1. Turn off the electrical equipment when not in use
2. Use of energy efficient light emitting diodes (LED) bulbs instead of incandescent or CFC bulbs.
3. Maintain appliances and replace old appliances
4. Use of computers and other electronic appliances in power saving mode
5. Increased production of solar energy, a type of non-conventional category of energy will be a good energy management system for college.

Eco friendly activities going on in the campus:

1. Planting and caring of trees in and around the campus
2. Timely disposal of wastes from the campus
3. Celebration of important days like world environment day, ozone day, water day etc. with great importance
4. Campus is declared as plastic free zone
5. Management has decided to adopt green protocol
6. Distribution of medicinal plants saplings among students

Consolidation of Audit findings:

The students have developed a greater appreciation and understanding of the impact of their actions on the environment. They successfully have been able to determine the impact on the environment through the various auditing exercises. Participating in this green auditing procedure, they have gained the knowledge about the need of sustainability of the college campus. It will create awareness on the use of the earth's resources in their home, college, local community and beyond.

Action Plan:

Policies referring to college management and approaches towards the use of resources need to be considered. The college should have a green policy/environmental policy formulated by the management of the college should be implemented meticulously.

Followup action and plans:

Green audits are exercises which generate considerable quantity of valuable management information. It is important to ensure that the findings and recommendations of the audit are considered at the correct level within the organization and the action plans and implementation programs result from the findings.

Audit followup is part of wider process of continuous improvement. Without followup the audit becomes isolated even which soon becomes forgotten in the measures of organizational priorities and the passing time.

Conclusion and list of recommendations:

Green audit reports assist in the process of attaining a ecofriendly approach to the sustainable development of the college. A few recommendations are added to reduce the menace of waste management using ecofriendly and scientific techniques. This may lead to the prosperous future in context of green campus and thus sustainable environment and community development.

Common recommendations:

1. Adaptation of environmental policy for the college
2. Purchase policy for environment friendly materials
3. More seminars and group discussions on environmental education should be conducted
4. Removal of damaged taps and installs sensitive taps if possible
5. Establishment of more rain harvesting systems
6. Awareness programs on water conservation
7. Display boards should be installed to control over usage of water
8. Wastewater can be recycled and used for garden and toilets

Energy:

9. Employment of more solar panels
10. Save energy awareness programs for students and staff
11. Replace computers and TVs with LED monitors
12. Energy efficient fans should be replaced
13. Observing power saving day every year

Waste:

14. Biogas plant should be established
15. Practice of waste segregation
16. More vermicomposting plants to be setup in the college
17. Establishment of plastic free campus
18. Avoid use of paper and plastic plates and cups for all functions in the college

Greencampus:

19. Create more space for planting

20. Potted plants in veranda and classrooms
21. Automatic drip irrigation system during summer holidays
22. Providing funds for internal clubs like science club, eco club etc. for making campus more green

Carbon foot print:

23. Carpooling system among the staff should be established.
24. Introduction of college bus services to the staff and students
25. Use of bicycles should be encouraged
26. More efficient cooking system in the canteen to save gas.

List of Audited Plants

Sl.No	Botanical Names	Common Names	Family	Habit	Economic Use	Number
46	<i>Aa</i>	Neem	Meliaceae	Tree	Medicinal	10
1	<i>Abelmoschus esculentus</i>	Bhendi	Malvaceae	Shrub	Edible	22
2	<i>Abutilon indicum</i>	Tuthurubenda	Malvaceae	Shrub	Medicinal	4
3	<i>Acacia melanoxylon</i>	Australian Blackwood	Mimosaceae	Tree	Ornamental	2
4	<i>Acalypha hispida</i>	Philippine Medusa	Euphorbiaceae	Shrub	Ornamental	6
6	<i>Acalypha indica</i>	Muripinda	Euphorbiaceae	Herb	Medicinal	252
5	<i>Acalyphalanceolata</i>	Muripinda	Euphorbiaceae	Herb	Medicinal	156

Energy Audit Report

ST. ANNS COLLEGE FOR WOMEN MALKAPURAM

Submitted to

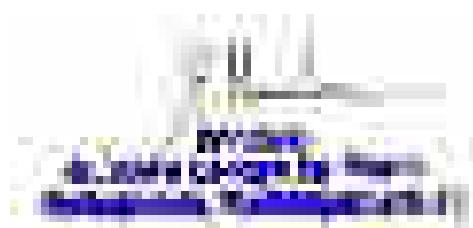

Principal

ST. ANNS COLLEGE FOR WOMEN MALKAPURAM

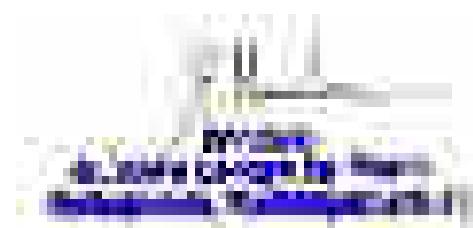

Preface

Data collection for energy audit of the St. Ann's college for women, malkapuram. Campus was conceded by team for the period of 1 Jun 2023-31 Jun 2024. This audit was overseen to inquire about convenience to progress the energy competence of the campus. To drop off energy utilization whilst cultivate or humanizing comfort, health and safety were of prime anxiety. This audit required to recognize the mainly energy proficient appliances. Besides, several each day processes concerning common appliances have been provided which facilitate sinking the energy expenditure. The energy audit survey was completed by Dept. Of Physics. All data collected from each classroom, laboratory, every room. The work is completed by considering, how much tubes, fan, A.Cs, electronic instruments, etc in each room. How much was participation of each component into total electricity consumption.

Acknowledgement

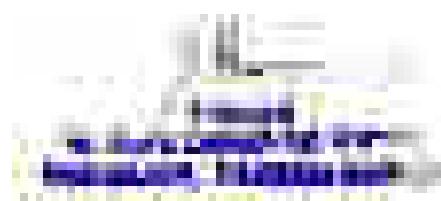

Head Department of Physics St. Ann's college for women,Malkapuram is very much thankful to Principal Dr.Sr.Prema Kumari,IQAC coordinator NAAC for motivating us for energy audit

Energy Audit Report of St Ann's College for Women, Malappuram Introduction:

A nation stirring to advance in quantity and quality to the spread of education among the common India and development of their intelligence. In India the entire field of education and other fields of intelligent activities had been monopolized by a handful of men before independence. But today we are marching towards the desirable status of a developed nation with fast strides. But the development should be a sustained one. For achieving such an interminable development energy management is essential. As far as concerning electricity crisis, we are facing lack of electricity during office work. So, institutional management is taking design regarding production of electricity and saving electricity for eco-social aspect.

Energy requirement of India is growing and incomplete domestic fossil fuel treasury. The country has motivated strategy to enlarge its renewable energy resources and policy to establish the nuclear power plants. India increases the involvement of nuclear power to largely electrical energy development facility from 5.2% to 11%. India's industrial demand accounted for 40% of electrical power requirement, domestic household use accounted for 30%, agriculture 25%, commercial 10%, and public lighting and other miscellaneous applications accounted for the rest. Energy conservation means reduction in energy consumption without making any sacrifice of

quantity or quality. A successful energy management program begins with energy conservation; it will lead to adequate rating of equipment's, using high efficiency equipment and change of habits which causes enormous wastages of energy. By observing all these study lack of electricity and huge electricity demands. It is necessary to plant to be self-sufficient in electricity requirement.

In the present study, college electricity audit has been done. In this study considered practical laboratory, instrument, Fans, air conditioners, Computers etc are considered in this study. We have studied total budget of the college, total economic investment of college on the electricity and total generation electricity from the solar wind hybrid electricity generation unit. Also, we have studied total saving of electricity and money from solar wind generation and requirement of solar energy. Also, it is studied that exact contribution of bulb, fans, computer, instruments etc in the total requirement of electricity. We studied all these mentioned thinks by collecting exactly data from survey.

Experimental and data collection:

All required data is collected by Department of Physics. In building, in every room, how much fans, tubes, fans, computer, instrument AC, etc will these be measured. According to survey following data is collected.

Total Power Requirement of various Equipment

Department\Instrument	Fan	LED Tubelight	CFL Tubelight	A.C.	Fridge	Computer	Printer	Scanner	Xerox Machine	Projector

Graphically Representation of Electricity Distribution:-

Fig. Contribution of tube light, fan, computer, printer, AC and instrument to total use of energy by Graphical Representation

Total requirement of electricity, generator on of electricity using renewable energy sources. -

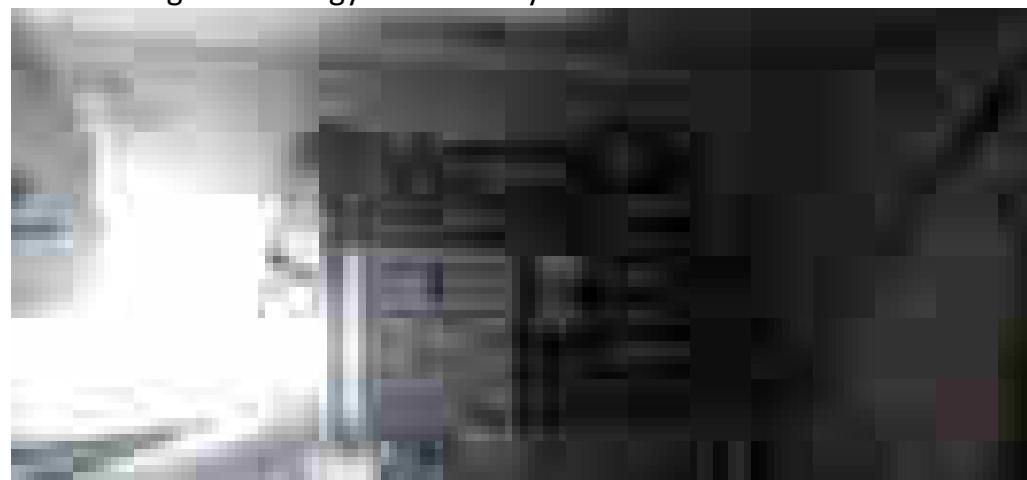

Power requirement by renewable energy sources	Total power requirement	Renewable energy source	Renewable energy generated and used
4026.040 units/Month	638 units/Month	Hybrid Solar and Wind	638 units/Month

PhotographofRenewableEnergySources-

Fig-SolarEnergyGeneratonsystem

FigPhotographofwind mies energygenerat ondevice

The hybrid energy generation devices contain a solar panel and wind turbine. The hybrid energy generation device generates 15 units per day. The college is now using 15 kW UPS and batteries for energy storage

Conclusion:

In conclusion, data generated in energy audit are useful for to understand the energy distribution and utilization of college. The college needs maximum 3024.040 KW of electricity. In other words college needs 10831 Units/month and hybrid energy generation device generate the only 536 units/moths. Recommendation:

- 1) Replace all ICFL Tube light using LED Bulb, to save more power.
- 2) Replace CRT monitor using LED or LCD monitor.
- 3) Separate connection of office, Computer Lab and classroom.

Results and discussion:

As far concerning the energy audit, electricity audit is main concern regarding educational institution. We have collected data by considering the tube light, fan, computer, printer, A.C and instruments. The total required energy is 3024.040 KW . Energy Consumption through all device is 10831 /Month and Hybrid Renewable source Generate 536 Unit/Month.

**ST.ANN'S. COLLEGE FOR WOMEN
MALKAPURAM, VISAKHAPATNAM - 530011**

Report of the Session

**Seminar on Quality maintenance in
Educational institutions and NEP 2020**

On **June 7, 2023**, a seminar on Quality Maintenance in Educational Institutions and NEP 2020 was held at St. Ann's College Auditorium. The keynote speaker, Professor Karanam Pushpanadam, delivered an insightful session focusing on fostering a supportive educational environment, integrating instructional design, and leveraging technology to improve teaching and learning practices. The seminar emphasized the importance of adopting effective teaching methodologies, providing constructive feedback, and aligning institutional goals with the objectives of NEP 2020. Educators and stakeholders actively participated in the discussions, sharing perspectives on modernizing education and improving quality standards. Professor Pushpanadam highlighted the transformative potential of technology in education and the need for collaborative approaches to achieve excellence. The seminar served as an engaging platform for exploring strategies to enhance teaching effectiveness and promote progressive educational practices.

Report of the Session

**Seminar on Awareness Programme on Four Years
Undergraduate Honours**

On **June 23, 2023**, the College Auditorium hosted an Awareness Programme on Four Years Undergraduate Honours focusing on the single major system. The seminar was attended by students and their parents, aiming to provide a comprehensive understanding of the program's structure, benefits, and opportunities. Expert speakers included Dr. Sr. Prema Kumari, Principal of the College, and Y. Anasuya Devi from the Department of Political Science. They elaborated on the curriculum design, career pathways, and the emphasis on holistic development offered by the extended four-year framework. The interactive session encouraged attendees to engage actively, ask questions, and clarify their doubts, leading to a better understanding of the academic journey and its outcomes. The seminar successfully fostered collaboration and communication between the college, students, and parents, serving as an informative platform for discussing the program's advantages and implementation.

Report of the Session

Seminar on E-Commerce and logistics

On July 10, 2023, the St. Ann's College Auditorium hosted a seminar on E-commerce and Logistics, organized by the Center of Excellence in Maritime and Shipbuilding. The seminar was led by Dr. Sarath Kumar, who shared valuable insights into the dynamic and evolving landscape of the e-commerce and logistics sectors. The session emphasized the integration of technology in streamlining logistics operations and advancing e-commerce platforms. A diverse audience actively participated, engaging in thought-provoking discussions about the challenges and opportunities within these industries. The seminar served as an insightful platform for exploring contemporary trends, enabling participants to enhance their understanding of the interplay between e-commerce and logistics in today's technology-driven world.

Report of the Session

3 Days Workshop on Women for better Tomorrow

A three-day workshop was organised by the management for the staff and students in the college auditorium on **13th July,2023 to 15th July 2023**. Topic of Day-1 was Women Empowerment and Ms.EPS Bhagya Lakshmi (Asst.Professor of Public Administration Dept) Y. Premalatha (Lecturer in PD) acted as a resource person. Topic of Day-2 was Creative Thinking and Research and Dr. Prasantha (Asst.Professor in MB), Anjali Devi (lecturer in Chemistry) acted as resource persons. Topic of day-3 was Personality Development and Adi Lakshmi (lecturer in Hindi department), Ms. Siva Rajani(lecturer in Telugu) acted as resource persons. The resource actively involved all staff and students in this workshop by conducting various games. The topic of this program was selected by the management and it is conducted to inculcate the core values for women to become a better version of herself.

Report of the Session

FDP ON Innovative Teaching and Learning Pedagogy

The management of the St.Anns college for women hosted a five-day Faculty Development Program (FDP) on "Innovative Teaching and Learning Pedagogy" to enhance modern teaching methodologies among faculty. Key sessions included insights from Sr. Gisela on creative pedagogy, P. Jayasri on activity-based learning, Y. Premalatha on multimedia tools, EPS Bhagyalakshmi on experiential learning, and Y. Anasuya Devi on community-based teaching. Each day featured engaging activities, fostering collaboration and innovation in teaching practices. The program concluded with participants expressing appreciation for the valuable learning experience.

This event was organized from **August 15th to 21st** in the auditorium of St. Ann's College for Women. It featured a series of sessions by esteemed speakers, covering innovative teaching and learning methodologies. Faculty members actively participated in discussions and activities aimed at enhancing their pedagogical approaches.

Report of the Session

Workshop on strategies of self Confidence

On **September 2, 2023**, St. Ann's College, Visakhapatnam, conducted an Orientation Workshop titled Strategies of Self Confidence in collaboration with IQAC. The workshop was led by the distinguished resource person Salmon P from John Maxwell Leadership (USA). The session highlighted strategies to enhance self-confidence, with Salmon P passionately motivating students to actively participate in various events and activities. The interactive workshop provided a platform for students to engage with the topic and gain insights into building a confident mindset.

Report of the Session

Orientation program on world's Literacy day

On **September 8, 2023**, the Department of English and Political Science at St. Ann's College for Women, VSP, marked International Literacy Day with a seminar themed "*Promoting Literacy for a World in Transition: Building the Foundation for Sustainable and Peaceful Societies.*" The seminar aimed to highlight the vital role of literacy in promoting sustainable and peaceful communities. The esteemed resource person for the event was Mr. Harinadh, Associate Professor and Head of the Department of Social Works, as well as the NSS Program Coordinator at Andhra University. His presentation emphasized how literacy serves as a cornerstone for social development and peace building. The seminar provided valuable insights into the importance of literacy in a rapidly changing world, encouraging participants to reflect on its role in shaping inclusive and harmonious societies.

Report of the Session

workshop on ERP training

On **September 13, 2023**, St. Ann's College for Women organized a workshop on **Enterprise Resource Planning (ERP)** for its staff. The session, facilitated by **Mr. Thomas**, aimed to enhance staff members' understanding of ERP systems and their applications. Mr. Thomas provided an in-depth overview of how ERP systems contribute to organizational efficiency by streamlining processes, improving decision-making, and fostering better collaboration. The interactive format allowed participants to engage actively, ask questions, and address specific concerns regarding ERP implementation. The workshop served as a platform for staff members to gain practical knowledge about ERP tools and their role in optimizing administrative and operational workflows.

Report of the Session

FDP on research paper writing

On **September 30, 2023**, St. Ann's College for Women in Visakhapatnam hosted a seminar on *Research Methodology and Writing Research Papers*. The seminar, held in the college auditorium, aimed to provide valuable insights into research practices and the quality of paper writing. The distinguished resource person, Dr. G. Sampath Kumar, a Scientist from Visakha Enviro Labs, shared his expertise on effective research methodologies and strategies for drafting well-structured research papers. The seminar offered staff members an opportunity to clarify their doubts and gain a deeper understanding of research practices. The event was attended by faculty members, students, Sr. Prema Kumari (Principal of the College), and Sr. Gesila (Correspondent). It served to foster a research-oriented environment within the college, encouraging participants to adopt best practices in research and paper writing.

2 Days Workshop on Learning Techniques for Autonomy in College

The Management of St. Ann's College organized a two-day workshop titled "*Promoting Autonomous Learning in College*" on June 8th and 9th, 2024, at the college auditorium. The event was aimed at fostering a culture of self-directed learning among students, encouraging them to take responsibility for their academic growth.

Sri Rangam Mathew, a distinguished educator and expert in innovative learning strategies, served as the resource person. He delivered insightful sessions on the importance of autonomy in education, effective study techniques, and the integration of technology for self-paced learning.

The workshop included interactive activities, group discussions, and practical demonstrations to engage the participants actively. Faculty members and students appreciated the relevance of the topic and the dynamic approach of the sessions.

The event concluded with a vote of thanks from the organizers, expressing gratitude to **Sri Rangam Mathew** for his valuable contribution and the participants for their enthusiastic involvement. This workshop served as a stepping stone toward nurturing a culture of independent and lifelong learning in the college community.

Orientation Program on Campus Safety and Hygiene

An Orientation Program on Campus Safety and Hygiene was organized for the non-teaching staff on **October 10, 2024**, in the Assembly Hall. The session aimed to enhance awareness about maintaining a safe and hygienic campus environment.

Dr. Sr. Prema Kumari served as the resource person for the event. She highlighted the importance of adhering to safety protocols, proper waste management, and personal hygiene to ensure a clean and secure workspace. The program included practical demonstrations and interactive discussions, encouraging active participation from the attendees.

The session was well-received, with participants expressing their gratitude for the valuable insights shared. This initiative reinforces the institution's commitment to creating a safe and healthy campus for everyone.
